

DUO ON THE WIRE

Duration 25 minutes on autonomous structure

Associating Tatiana Bongonga's acrobatics and dances to Didier Pasquette's bicycles, the acts performed by these two artists are both modern and as old as the tightrope walking itself.

To their sound technique is added a touch of freshness that expresses the pleasure they have to devote themselves to an art as delicate as risky.

From France to Japan, this duo continues its journey for the highest astonishment of the public...

The image shows two acrobats performing on a tightrope structure. One acrobat, a man in a white shirt and dark trousers, is balancing on a horizontal wire. The other acrobat, a woman in a dark outfit, is performing a balancing act on a lower wire. The background is a deep blue, and the structure consists of several thin, dark lines.

DUO ON THE WIRE

Duration 25 minutes, on autonomous structure

Technical informations:

- The representation can take place on the "mobifil" (mobile rope), self supporting structure that doesn't require any technical logistics if only two setting points for the lateral ropes (Cavaletti ropes).
- Space: 16m (L) x 16m (w) x 12m (h).
- Light: company's own equipment (4 000W)
- Sound: supply sound equipment for CD music

The mobifil
